

OM NAVLE

Software Engineer — AI Engineer

+91-9158781184 | omnavle06@gmail.com | [linkedin.com/in/omnavle](https://www.linkedin.com/in/omnavle) | github.com/omnavle | [Portfolio](#)

PROFESSIONAL SUMMARY

Passionate AI & Data Science undergraduate with expertise in Software Engineering, Machine Learning, and Generative AI. Hands-on experience building AI-powered applications, agentic workflows, RAG systems, backend services, and ML models using Python, FastAPI, LangChain, and SQLAlchemy.

TECHNICAL SKILLS

Programming Languages: Python, Java

Software Engineering: FastAPI, REST APIs, SQLAlchemy, OOP, Data Structures & Algorithms

Frameworks Libraries: React, Next.js, Node.js, Express, Tailwind CSS

Generative AI: LangChain, LangGraph, RAG, Prompt Engineering, Multi-Agent Systems, Ollama

Machine Learning: Classification, Regression, NLP, Feature Engineering, Model Evaluation

Libraries: Pandas, NumPy, Scikit-Learn, Hugging Face

Databases: PostgreSQL, MySQL, ChromaDB

Tools: Git, GitHub, Linux, VS Code, Jupyter Notebook

EXPERIENCE

Software Developer Intern — Cyber Sakshar Nashik

May 2023

- Contributed to 3 live client projects, implementing responsive front-end interfaces and dynamic back-end APIs to enhance performance and usability
- Collaborated with a team of developers and designers to integrate RESTful APIs, improving feature scalability and reducing load time by 30
- Built and deployed interactive web modules using React.js and Tailwind CSS, ensuring mobile-friendly and cross-browser compatible design.

PROJECT EXPERIENCE

QUERYMIND AI – Agentic Text-to-SQL Data Assistant

Python, FastAPI, SQLAlchemy, LangChain, MySQL, langgraph

- Developed an agentic Text-to-SQL assistant that enables users to query relational databases using natural language through a multi-agent workflow.
- Designed specialized AI agents for query planning, schema understanding, SQL generation, validation, automatic query correction, and answer generation.
- Built a FastAPI backend with REST APIs, conversation session management, context-aware follow-up queries, and real-time streaming using Server-Sent Events.

RESEARCHOS – Multi-Agent Research System

Python, LangChain, LangGraph, Groq, Tavily

- Developed a multi-agent AI research platform using LangChain and LangGraph to automate planning, web search, reasoning, and report generation.
- Integrated Groq LLMs and Tavily Search for real-time information retrieval, enabling structured, context-aware research reports from multiple sources.

AI Code Reviewer - Intelligent Code Review

React, Google Gemini API, Tailwind CSS

- Developed an AI-powered code editor that analyzes and reviews code in real-time, providing instant feedback on syntax errors and logic improvements.
- Integrated Google Gemini API to evaluate code quality, suggest optimizations, and generate intelligent explanations for detected issues.
- Designed an intuitive, responsive UI using React and Tailwind CSS, enabling smooth code editing, review visualization, and error highlighting.
- Implemented secure API handling and session management to ensure data integrity during live code evaluation.

GALEMED AI – Medical Knowledge Assistant

Python, LangChain, RAG, ChromaDB, Hugging Face

- Built a Retrieval-Augmented Generation application using The Gale Encyclopedia of Medicine, enabling accurate medical question answering through semantic document retrieval.
- Implemented semantic search using Hugging Face embeddings and ChromaDB, improving response reliability by grounding answers in retrieved medical knowledge.

EDUCATION

Bachelor of Engineering in Electronics & Telecommunication

Expected May 2027

Bharati Vidyapeeth's College of Engineering, Pune

SGPA: 7.03 / 10

Diploma in Computer Technology

Completed May 2024

K.K. Wagh Polytechnic, Nashik

Percentage: 79.89

ACHIEVEMENTS & CERTIFICATIONS

- Published Paper – “Theory Exam Seat Management System” (IEEE, Mar 2023).
